# PROTIBOX

Innovation locale, impact global

Source: ADEME (French Environment and Energy Management Agency)

## 239 million tons of organic matter that could have been valorized.

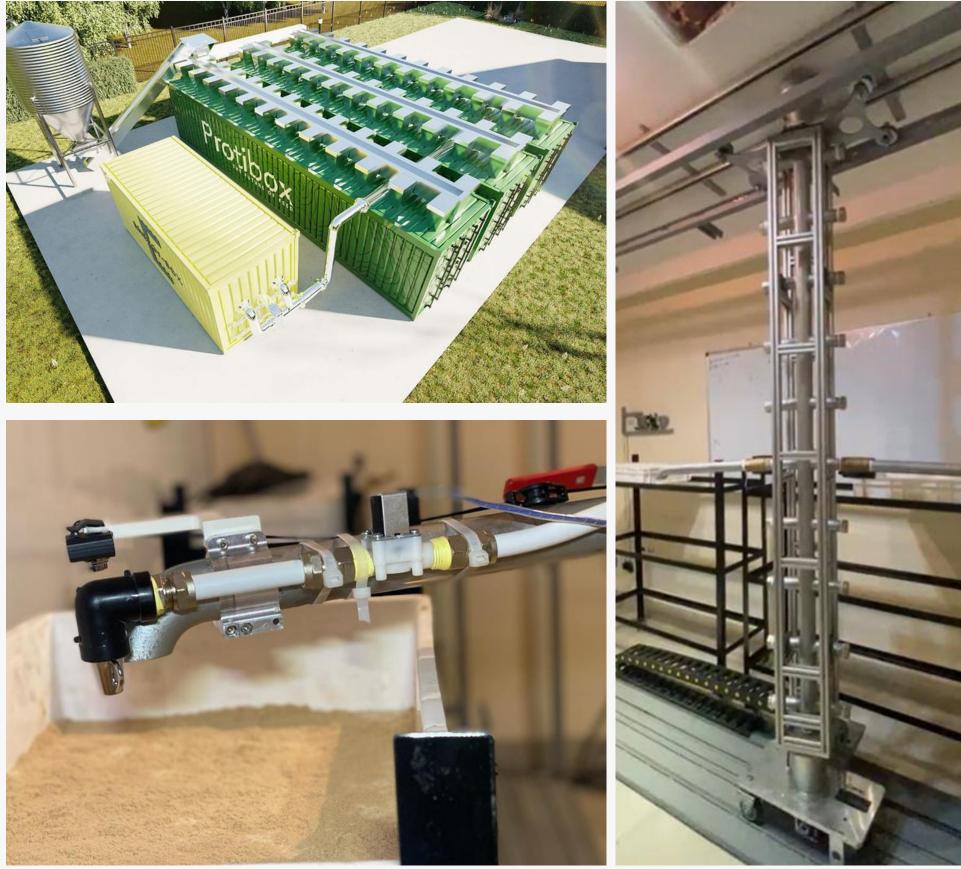

20 billion € The expenditure is the cost incurred for waste treatment each year..

# Ø **SOLUTION**

We build and operate turnkey modular insect farms that valorize organic waste into protein-rich flours, oil and fertilizers.

# Towards circular, ecological, and profitable models!

- A world where circular and sustainable economic models shape the future.
- A world where green technology creates value from waste.
- A world where continuous innovation ensures long-term success.

## A game-changing innovation!

# 6. 23 tons of useful products /month.

### The market size for the treatment of organic waste.

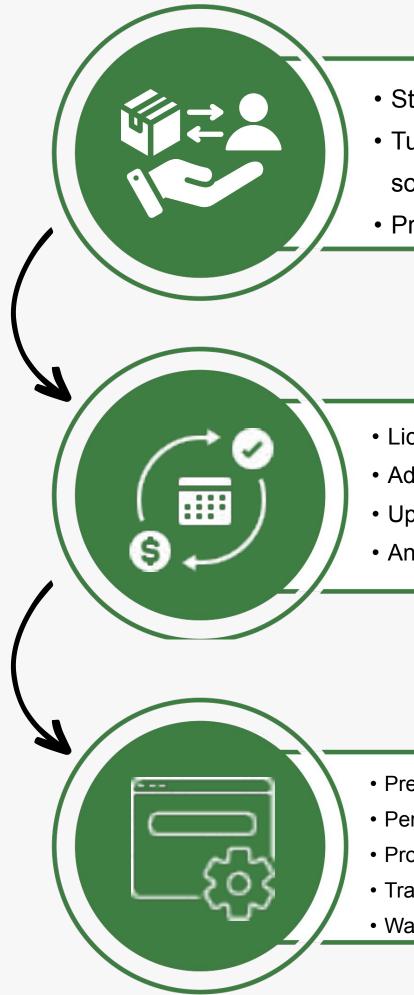

- Share corresponding to innovative valorization technologies.Objective: Over 20 billion euros.
- Share corresponding to innovative valorization technologies.
  Approximately 10% of the TAM
  Which is 2 billion.
- Protibox's targeted market share within this segment by 2027.Targeting 0.5% of this segment by 2027, equivalent to 10 million euros.

# Business

### Model

. . . . .

#### SALES OF CONTAINERIZED FARM UNITS

- Standard units of various sizes.
- Turnkey solutions with embedded hardware and software.
- Price range based on capacities.

#### SUBSCRIPTION SERVICE

- License for the use of our optimization software.
- Additional software module packs.
- Updates and telephone support included.
- Annual subscription renewal.

#### **MAINTENANCE CONTRACTS.**

- Preventive and corrective maintenance contracts.
- Performance monitoring and reporting.
- Production management support.
- Training and guidance.
- Warranty extension.

Modularity and scalability of the system.

Show initial investment.

Simple administrative procedures.

 $\bigotimes$  Promotion of circular economy.

High return on investment (ROI).

Biological process.

- **×** High treatment cost.
- X Management and storage of digestate.
- × Requires significant space.
  - Complex administrative procedures.
- Promotion of circular economy.
  - Biological process.

#### 2024 (Mid-2024)

- Implementation of the Proof of Concept (P.O.C.).
- Validate the tool, launch ProtiBox solutions, establish key partnerships.

2025

01

02

03

- Deployment of 12 pilots.
- Fundraising (2025): To support expansion.

### 2026• National deployment.

# Roadmap

This timeline highlights the key stages of our fundraising and development, emphasizing dates and significant achievements for the company.

# Our Team

Meycem Mariem Abdelhamid

Embedded systems engineer

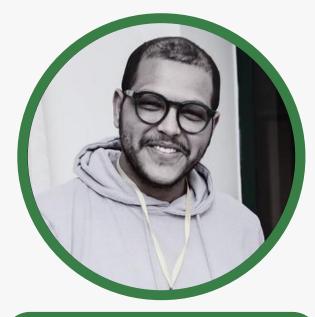

Houssem Ben Abderrahmen

Dev Ops engineer

# The positive impacts for the region

Direct and indirect jobs created within

the next 3 years.
Local job opportunities thanks to the new industry.

-50% of CO2

emissions Thanks to organic waste treatment

• Reduction of the carbon footprint of

waste treatment.

#### 25 millions Dollars

#### 25 million euros of added value

generated in 2027
Wealth generated in the region through this economic activity
